

Table of contents

CHAPTER 1	
ANATOMY AND PHYSIOLOGY OF THE CONDUCTION SYSTEM	1
Anatomy of the conduction system.....	1
Anatomical substrates for arrhythmias.....	8
The action potential	9
Correlation between the phases of the action potential and electrocardiographic waves.....	12
Electrical properties of the myocardium and their relationship with the action potential.....	13
Spontaneous automaticity of pacemaker cells.....	14
Atrioventricular conduction.....	16
Propagation of the cardiac electrical impulse	17
Cardiac nervous control.....	18
Other factors that influence cardiac activity.....	19
CHAPTER 2	
PRINCIPLES OF ELECTROCARDIOGRAPHY	21
Historical notes.....	21
The surface electrocardiogram.....	21
CHAPTER 3	
FORMATION AND INTERPRETATION OF THE ELECTROCARDIOGRAPHIC WAVES	35
The electrocardiograph.....	35
Recording and calibration of the electrocardiographic tracing.....	35
Formation of the electrocardiographic waves.....	39
Electrocardiographic analysis.....	47
Tools for interpreting the electrocardiogram.....	62
Electrocardiography during the first weeks of life.....	63
Artifacts.....	64
CHAPTER 4	
NORMAL SINUS RHYTHMS	71
Sinus rate.....	71
Sinus rhythm.....	72
Sinus arrhythmia.....	72
Sinus rhythms with other arrhythmias.....	81
CHAPTER 5	
CHAMBER ENLARGEMENT	83
Atrial enlargement.....	83
Ventricular enlargement.....	86
CHAPTER 6	
BACKGROUND TO THE DIAGNOSIS OF ARRHYTHMIAS	93
Mechanisms of arrhythmias.....	93
Abnormalities of impulse formation: automaticity and triggered activity.....	94
Abnormalities of impulse conduction.....	97
Classification of arrhythmias.....	102
Hemodynamic consequences of arrhythmias.....	105
Arrhythmia-related clinical signs.....	119
Diagnosis of arrhythmias.....	119
CHAPTER 7	
SUPRAVENTRICULAR BEATS AND RHYTHMS	131
Ectopic atrial beats and rhythms.....	131
Junctional ectopic beats and rhythms.....	135
Patterns of ectopic supraventricular beats.....	139
Relationship between atrial and ventricular activation.....	140
Atrial parasystole.....	141
Atrial dissociation.....	142

CHAPTER 8

SUPRAVENTRICULAR TACHYCARDIAS

145

Sinus tachycardia.....	145
Atrioventricular nodal reciprocating tachycardia.....	146
Focal junctional tachycardia and non-paroxysmal junctional tachycardia.....	149
Atrioventricular tachycardias mediated by accessory pathways.....	151
Focal atrial tachycardia.....	163
Multifocal atrial tachycardia.....	166
Macro-reentrant atrial tachycardia (atrial flutter).....	166
Atrial fibrillation.....	174
Differential diagnosis of narrow QRS complex tachycardias in the dog.....	181

CHAPTER 9

VENTRICULAR ECTOPIC BEATS AND RHYTHMS

189

Ventricular ectopic beats.....	189
Ventricular parasytrole.....	200

CHAPTER 10

VENTRICULAR ARRHYTHMIAS

203

Defining tachycardia.....	203
Describing tachycardia.....	204
Monomorphic ventricular tachycardias.....	206
Polymorphic ventricular tachycardia.....	216
Bidirectional ventricular tachycardia.....	220
Ventricular fibrillation.....	220

Ventricular tachycardia without structural cardiac disease.....

222

Ventricular tachycardia during familial dilated cardiomyopathy.....

226

Ventricular tachycardias during arrhythmogenic cardiomyopathy.....

227

Ventricular tachycardias during myocarditis.....

228

Ventricular tachycardia during ischemic cardiomyopathy.....

230

Ventricular tachycardia during ventricular hypertrophy.....

230

Ventricular tachycardia during congestive heart failure.....

231

Ventricular tachycardias during systemic diseases.....

231

Differential diagnosis of wide QRS complex tachycardia.....

231

Determining the danger of ventricular tachycardias.....

234

CHAPTER 11

BRADYARRHYTHMIAS

239

Sinus bradycardia.....

239

Sinus arrest.....

245

Sinus standstill.....

246

Sinus node dysfunction or sick sinus syndrome.....

247

Atrial standstill or atrioventricular muscular dystrophy.....

252

Sino-ventricular rhythm.....

253

Asystole or ventricular arrest.....

254

Pulseless electrical activity or electromechanical dissociation.....

256

CHAPTER 12	
CONDUCTION DISORDERS	259
Disorders of atrial conduction.....	259
Inter-atrial conduction block	262
Atrioventricular blocks.....	262
Intraventricular conduction disorders or bundle branch blocks.....	272
Aberrant conduction.....	286
Linking or sustained aberrant conduction.....	288
Gap phenomenon and supernormal conduction	289
CHAPTER 13	
ELECTROCARDIOGRAPHIC CHANGES SECONDARY TO SYSTEMIC DISORDERS AND DRUGS	293
Hypoxia.....	293
Electrolytic disorders.....	293
Pericardial diseases.....	297
Abdominal diseases.....	297
Chronic respiratory diseases.....	298
Endocrine diseases.....	299
Intracranial diseases	300
Hyperthermia and hypothermia.....	301
Electrocution.....	301
Autoimmune diseases	301
Drugs.....	302
CHAPTER 14	
ELECTROCARDIOGRAPHY AND PACING	313
Basic components of the pacemaker.....	313
Pacing modes.....	314
Pacemaker malfunction.....	318
GUIDED INTERPRETATION OF ELECTROCARDIOGRAPHIC TRACINGS	325
ALPHABETICAL INDEX	341
